Thumb DFU upgrade Guide(only for Thumb software version less then 2.0.0)

Note: If you software version is higher then 2.0.0 ,you can upgrade thumb controller by MOZA Assistant (Win/Mac).

After this upgrade, you can upgrade the thumb controller using the "MOZAAssistant" software.

1. Tool preparation

Download the DFU software from: https://www.gudsen.com/upfile/admin/file/download/Lite2Thumb.zip

📑 Lite2Thumb.zip

2. Recognize the thumb controller hardware and firmware version

There are 2 hardware versions of thumb controller, which are B & C. We will illustrate using the version C, the first letter of the barcode indicates the version number. Use Lite2_Thumb_B_2.0.0.dfu for hardware version B; and Lite2_Thumb_C_2.0.0.dfu for hardware version C

3. Enter to DFU mode

When the thumb controller is off, hold the "Option" button, plug in the USB cable; now you are entering the DFU mode

4. Open the downloaded DfuSe Demo software, select the firmware
