7. Restart the gimbal. To check the firmware version running on the gimbal go to setting-general-about.

Upgrade via MOZA Master App.

- 1. Turn off the gimbal.
- 2. Turn on your smartphone's Bluetooth and Location (Fig1).
- 3. Press and hold in the **Aircross 2's center button** (do not release the center button), then **click the power button.** "Boot Mode" will be displayed on the Aircross 2's screen.
- 4. Open the MOZA Master App (Fig2), then press "connect" button to access the device page (Fig 3), then press + button to search for your Aircross 2 device (Fig4).
- 5. Select Aircross 2 from the device list (Fig5), and then click "connect" to connect your smartphone to the Aircross 2 (Fig6).
- The App will automatically enter the firmware upgrade mode. Press the "confirm" button (Fig 7&8). The upgrading process can take about 5 minutes for the firmware to be downloaded and installed.
- 7. The upgrade process will display 100% when the firmware upgrade has completed (Fig9).
- 8. Disconnect your smartphone from the gimbal and restart the gimbal. Now you are ready to film.
