

MOZA Mini MX Release Note

Date	2020/07/13
Firmware (Mini MX)	V1.0.21

What's New about Mini MX?

1. Added gimbal's Bluetooth one-key reset function.
2. Modified Bluetooth's name.
3. Optimized Mini MX stability.

Note: Below are detailed explanations for some points listed above.

Descriptions:

Point 1:

1. Operation steps: When the gimbal is on, press and hold the Zoom+ button and power button at the same time until the indicator flashes once, then release the buttons. That will reset the Bluetooth for better pairing.
2. Operating environment: When the current mobile phone Bluetooth cannot find the Mini MX, it is best to reset the Bluetooth in order to prevent the device Bluetooth from being automatically connected by other mobile phones.

Point 2

1. Factory Mini MX Bluetooth name: MOZA Mini MX device number → MOZA Mini MX device number +A
2. When Mini MX performs a Bluetooth reset, the last letter of the Bluetooth device name will be changed from A→B, and so on, the range is A→Z, and once reached Z, it will be back to A.

Point 3

1. Firmware 1.0.21 optimizes the overall stability and resolves the issue when the gimbal is trembling while using with heavier phones.
2. For some mobile phones with a weight between 145g~170g, it is recommended to use with the case on.
